

Lean Offerings

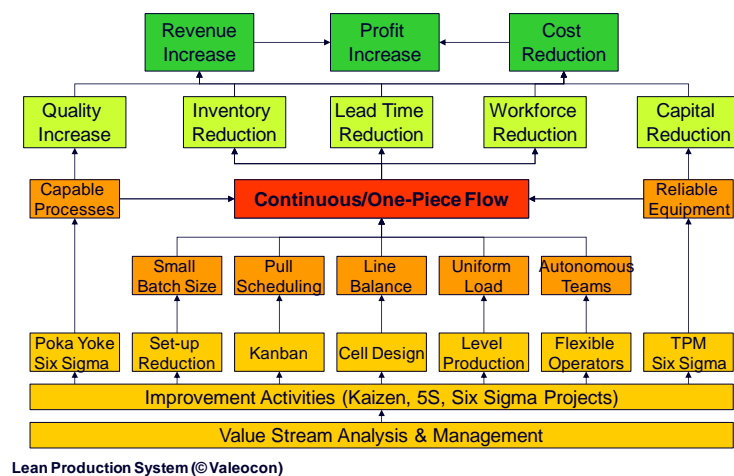

Achieving High-Performing Organisations Through Waste Reduction to Become "Lean"

Lean tools are invaluable for effective review and improvement of the value stream of any company. The value stream is the Lean perspective of defining customer value, making value flow, letting customers determine the product or service they want, and relentlessly pursuing perfection in a timely manner at an appropriate price. Lean focuses on the elimination or reduction of steps that don't add value to the customer.

COE helps clients to review their value streams and cut waste out of their processes.

Our Lean Offerings include:

- Overview Workshop for Champions and Sponsors (2 days)
- Lean Awareness Workshop (1 day)
- Lean Manufacturing Training (5 days)
- Lean in the Office Training (5 days)
- Value Stream Mapping Workshop (2 days)
- Kaizen Workshop

As Lean is a hands-on approach that needs application to unfold its full potential, we are working together with our clients on Lean projects rather than only training your employees.

Our Value Proposition

Our consulting team bring with them experience in implementing medium and large scale programmes to deliver bottom-line and top-line results.

We enhance the skills of your people so as to empower them to successfully continue and apply the tools and methods learned into the future.

We transfer our knowledge to your people throughout our relationship. Your learning is part of the project. "Success" = Results + Skills Transfer
